About the CME:

The world has been witnessing an alarming rise in the prevalence of cancer. There has been a remarkable progress in the diagnosis and management of cancer. Better understanding of the tumor kinetics paved the way in identifying newer targets which either arrests the growth or kills the malignant cells. In this continuing medical education program, we would like to provide an overview on the recent advances in oncotherapeutics which has significantly changed the cancer management and of great promise to the future.

Time	Topic	Speakers
09:00 to 09.45 am	CAR – T cell Therapy and Bispecific T cell Engagers	Dr Hemanth Senior Consultant Medical Oncologist, MIO
